Warren Wong

VP of Solutions Engineering · **EvoMap**

wwwc@outlook.com / Hong Kong / linkedin.com/in/warren-wong / github.com/somethingwentwell

AI technical and commercial leader with 10+ years across APAC, specialising in enterprise AI, agentic systems and cloud-native architecture. Builds and leads high-performing solutions engineering teams, shapes go-to-market strategy and acts as a trusted advisor to global key accounts — translating complex enterprise needs into scalable products, production deployments and sustained business growth.

EXPERIENCE

VP of Solutions Engineering

May 2026 — Present

EvoMap · Shenzhen / Hong Kong

- Lead commercialization of EvoMap and EvoX, an enterprise AI desktop agent, translating agentic AI capabilities into enterprise-ready solutions and repeatable go-to-market offerings.
- Lead the commercial team across solutions engineering, customer discovery, technical sales, solution design and enterprise adoption.
- Define product positioning and commercial strategy with product and engineering, turning customer requirements into roadmap priorities.
- Drive strategic enterprise engagements across APAC from executive discovery and technical validation through pilot design and deployment planning.
- Establish scalable sales engineering practices, solution playbooks and partner motions to accelerate customer acquisition and production adoption.

Head of Solution Architecture

Jan 2025 — Apr 2026

Dify · Hong Kong (Remote)

- Established and scaled the global Solution Architecture department from zero at the open-source LLM app platform — recruitment standards, technical benchmarks and delivery workflows.
- Led technical engagement for global key accounts across the lifecycle from PoC to MVP customisation and production-grade deployment.
- Architected agentic AI workflows and RAG pipelines meeting enterprise-grade security, scalability and performance requirements.
- Key customers — Mercedes-Benz (DE), DBS (SG), AIA (HK), HKMA (HK).

Senior Solution Architect

Jan 2022 — Feb 2024

Jihu GitLab · Hong Kong (Remote)

- Launched and initiated the GitLab SaaS platform (gitlab.hk) for the Hong Kong market.
- Provided end-to-end architecture support for strategic customers on cloud-native deployment and adoption.
- Contributed to core GenAI feature development as part of the global GitLab GenAI team.
- Key customers — Bank of East Asia, Bank of China, Melco Resorts & Entertainment, Hospital Authority.

CORE SKILLS

Agentic AI
Multi-agent orchestration · MCP · A2A · Tool calling · Context engineering · Agent memory · Self-evolving agents · Computer use

Agent frameworks
Claude Agent SDK · OpenAI Agents SDK · LangGraph · LangChain · Dify

AI coding agents
Claude Code · Codex · Cursor · GitHub Copilot · Agent Skills

LLMOps & evals
LLM gateways · LiteLLM · Langfuse · Evals · Guardrails · Token cost optimisation

RAG & retrieval
Hybrid search · Milvus · Qdrant · Weaviate · Elasticsearch

Cloud & platform
Azure · AWS · GCP · Alibaba Cloud · Kubernetes · Terraform · Helm · ArgoCD · Kong Gateway · FastAPI · Prometheus · Grafana

Programming
Python · TypeScript · SQL · Bash

EXPERIENCE (continued)

Senior Regional Field Engineer
Jul 2021 — Jan 2022

Kong · Hong Kong (Remote)

- Led global bank API projects across APJ, implementing APIOps and GitOps practices.
- Designed microservice architectures and decoupled monolithic applications through custom plugin development.
- Key customers — HSBC, MUFG, Standard Chartered, Transport for NSW (AU).

Cloud Solution Architect
Jul 2017 — Mar 2020

Microsoft · Hong Kong (Hybrid)

- Provided end-to-end support to prioritised ISVs on large-scale Kubernetes and DevOps projects.
- Drove early adoption of Azure services such as IoT and blockchain through high-level PoCs and hackathons.
- Developed solutions leveraging Microsoft's three-cloud value proposition to expand local business reach.
- Key customers — HKTVmall, MoneySQ, CryptoBLK.

TEACHING & TRAINING

Technical Trainer · Microsoft
Jan 2025 — Oct 2025

- Delivered Microsoft technical training focused on Microsoft Copilot, GitHub Copilot and application development.

Lead Trainer (Part-time) · Feva Works IT Education Centre
Mar 2018 — Oct 2024

- Led the trainer team delivering Microsoft AI & IoT curriculum and professional certification training in Cantonese, English and Mandarin.

Tutor (Part-time) · Institute of Vocational Education
Jul 2017 — Sep 2018

- Organised and delivered Industrial Attachment programmes on bot and mobile development.

RECOGNITION

Microsoft MVP
Most Valuable Professional, 2020 — 2025

CERTIFICATIONS

Certified Kubernetes Application Developer
The Linux Foundation

Professional Cloud Architect
Google Cloud

AWS Solutions Architect — Associate
Amazon Web Services

Azure Solutions Architect Expert
Microsoft

Azure DevOps Engineer Expert
Microsoft

Azure AI Engineer Associate
Microsoft

Azure Security Engineer Associate
Microsoft

Microsoft Certified Trainer
Microsoft

EDUCATION

BSc in Information Security
The Hong Kong Polytechnic University
Specialised in cryptography and blockchain

LANGUAGES

Cantonese	Native
English	Fluent
Mandarin	Fluent
